SECTION 1: Identification of the substance/mixture and of the company/undertaking

Product identifier

Product form : Mixture

Product name : Eurol Food Hydro HV 32

Product code : S004102 Product group : Trade product

1.2. Relevant identified uses of the substance or mixture and uses advised against

121 Relevant identified uses

Intended for general public

Main use category : industrial use, professional use, consumer use

Use of the substance/mixture : Lubricant

Function or use category : Lubricants and additives

Uses advised against

No additional information available

1.3. Details of the supplier of the safety data sheet

SECTION 4: First aid measures

4.1.	Description	

First-aid measures general : Seek medical attention if ill effect develops.

First-aid measures after inhalation Take victim to fresh air, in a quiet place, in an half laying position and if necessary take medical advice. Allow the victim to rest.

First-aid measures after skin contact Remove affected clothing and wash all exposed skin area with mild soap and water, followed by warm water rinse. High-pressure injection under skin may cause serious damage. Seek medical attention if ill effect or irritation develops.

First-aid measures after eye contact Remove contact lenses, if present and easy to do. Continue rinsing. Ensure adequate flushing of eyes by separating eyelids with the fingers. Obtain medical attention if pain, blinking, tears or redness persist.

First-aid measures after ingestion : Consult a doctor/medical service if you feel unwell. If vomiting occurs spontaneously, keep head below the hips to prevent aspiration. Do not induce vomiting.

Most important symptoms and effects, both acute and delayed

Symptoms/injuries after inhalation : At normal ambient temperatures this product will be unlikely to present an inhalation hazard because of its low volatility. May be harmful by inhalation if exposure to vapour, mists or fumes

resulting from thermal decomposition products occurs.

Symptoms/injuries after skin contact : Unlikely to cause harm to the skin on brief or occasional contact but prolonged or repeated exposure may lead to dermatitis. High pressure injection of product into the skin may lead to local necrosis if the product is not surgically removed.

Symptoms/injuries after eye contact : Unlikely to cause more than transient stinging or redness if accidental eye contact occurs.

Indication of any immediate medical attention and special treatment needed

Bad taste. Unlikely to cause harm if accidentally swallowed in small doses, though larger Symptoms/injuries after ingestion

quantities may cause nausea and diarrhoea.

Symptoms/injuries upon intravenous · Unknown

administration

Treat symptomatically.

SECTION 5: Firefighting measures

Extinguishing media

Suitable extinguishing media : Carbon dioxide (CO2), dry chemical powder, foam. Water fog.

: Do not use a heavy water stream. Use of heavy stream of water may spread fire. Unsuitable extinguishing media

5.2. Special hazards arising from the substance or mixture

: Combustion generates : CO, CO2, POx, NOx, SOx, H2S. Fire hazard

: Not expected to be a fire/explosion hazard under normal conditions of use. Explosion hazard

Advice for firefighters

Precautionary measures fire : Do not enter fire area without proper protective equipment, including respiratory protection.

Firefighting instructions : Use water spray or fog for cooling exposed containers.

Protection during firefighting Use self-contained breathing apparatus and chemically protective clothing.

Other information Prevent fire-fighting water from entering environment. Sweep up and remove to a suitable,

clearly marked container for disposal in accordance with local regulations.

SECTION 6: Accidental release measures

Personal precautions, protective equipment and emergency procedures

General measures : Spill area may be slippery. Prevent soil and water pollution. Prevent entry to sewers and public

6.1.1. For non-emergency personnel

Protective equipment : When the risk of skin exposure is high (e.g. when cleaning up spillages or if there is a risk of

splashing) then chemical resistant aprons and/or impervious chemical suits and boots will be

required. Use protective clothing

Emergency procedures : Consider evacuation.

6.1.2. For emergency responders

: When the risk of skin exposure is high (e.g. when cleaning up spillages or if there is a risk of Protective equipment

splashing) then chemical resistant aprons and/or impervious chemical suits and boots will be

required.

Emergency procedures : No specific measures are necessary.

Environmental precautions

Dike for recovery or absorb with appropriate material. Notify authorities if product enters sewers or public waters. Prevent soil and water pollution. Prevent liquid from entering sewers, watercourses, underground or low areas. Contain any spills with dikes or absorbents to prevent migration and entry into sewers or streams.

Methods and material for containment and cleaning up

For containment : Large quantities: Contain large spillage with sand or earth.

Methods for cleaning up : Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust).

Take up large spills with pump or vacuum and finish with dry chemical absorbent.

Use suitable disposal containers. Sweep up and remove to a suitable, clearly marked container Other information

for disposal in accordance with local regulations. On water, recover/skim from surface and pour

out in disposal container.

Reference to other sections

For further information refer to section 13.

SECTION 7: Handling and storage

Precautions for safe handling

Additional hazards when processed : Empty containers retain product residue (solid, liquid, and/or vapor) and can be dangerous. Do not pressurize, cut, weld, braze, solder, drill, grind, or expose such containers to heat, flame,

sparks, static electricity, or other sources of ignition. They may explode and cause injury or death. Empty containers should be completely drained, properly closed, and promptly returned

to a drum reconditioner or disposed of properly.

Avoid prolonged and repeated contact with skin. May be dangerously slippery if spilled. Where Precautions for safe handling

contact with eyes or skin is likely, wear suitable protection. Do not eat, drink or smoke during

use. Remove contaminated clothing and shoes

Take all necessary measures to avoid accidental discharge of products into drains and Hygiene measures waterways due to the rupture of containers or transfer systems. Handle in accordance with good industrial hygiene and safety practice. Wash hands and other exposed areas with mild

soap and water before eating, drinking or smoking and when leaving work. Where contact with eyes or skin is likely, wear suitable protection. Wash contaminated clothing before reuse.

Conditions for safe storage, including any incompatibilities

Technical measures : Keep container tightly closed and in well ventilated place.

Storage conditions Store in original container.

Reacts vigorously with strong oxidizers and acids. Incompatible products

Maximum storage period : 5 year Storage temperature : ≤ 40 °C

Prohibitions on mixed storage : Keep away from : oxidizing materials. strong acids.

: Store at ambient temperature. Storage area

Special rules on packaging : Keep container tightly closed and dry.

Specific end use(s)

Exposure-value for oil mist : 10 mg/m3 (15 min.) or 5 mg/m3 (8 hours).

8.2. Exposure controls

Appropriate engineering controls : Large quantities: Contain large spillage with sand or earth.

Personal protective equipment : Gloves. In case of splash hazard: safety glasses. Eye protection should only be necessary

where liquid could be splashed or sprayed.

Materials for protective clothing : PVC gloves. Neoprene or nitrile rubber gloves

Hand protection : In case of repeated or prolonged contact wear gloves. The gloves should be replaced

immediately in case of damage or signs of wear. It is recommended to use preventative skin protection (skin cream). The protection glove should be tested for its specific suitability (e.g.

mechanical strength, product compatibility, anti-static properties).

Eye protection : Eye protection should only be necessary where liquid could be splashed or sprayed

Skin and body protection : No special clothing/skin protection equipment is recommended under normal conditions of use.

Avoid repeated or prolonged skin contact. If repeated skin contact or contamination of clothing

is likely, protective clothing should be worn. Equipment should conform to EN 166.

Respiratory protection : Respiratory protective equipment is not normally required where there is adequate natural or local exhaust ventilation to control exposure. Where excessive vapour, mist, or dust may result,

use approved respiratory protection equipment. Respiratory protective equipment must be checked to ensure it fits correctly each time it is worn. Provided an air-filtering/air-purifying respirator is suitable, a filter for particulates can be used for mist or fume. Use filter type P or comparable standard. A combination filter for particles and organic gases and vapours (boiling point >65°C) may be required if vapour or abnormal odour is also present due to high product

temperature. Use filter type AP or comparable standard.

Environmental exposure controls : See Heading 12. See Heading 6.

Consumer exposure controls : PVC gloves. Neoprene or nitrile rubber gloves.

Other information : Do not put the product-soaked rags into the pockets of working clothes. Do not use cloths stained with the product to dry hands. Wash hands and other exposed areas with mild soap and water before eating, drinking or smoking and when leaving work. Do not eat, drink or

smoke during use. Wash contaminated clothing before reuse.

SECTION 13: Disposal considerations

Waste treatment methods

Regional legislation (waste) : Disposal must be done according to official regulations.

: Dispose in a safe manner in accordance with local/national regulations. Do not discharge into Waste disposal recommendations

drains or the environment.

Additional information : Hazardous waste.

Ecology - waste materials Every mixture with foreign substances such as solvents, brake- and cooling liquids is forbidden. Empty containers retain product residue (solid, liquid, and/or vapor) and can be dangerous. Do

not pressurize, cut, weld, braze, solder, drill, grind, or expose such containers to heat, flame, sparks, static electricity, or other sources of ignition. They may explode and cause injury or death. Empty containers should be completely drained, properly closed, and promptly returned to a drum reconditioner or disposed of properly. When not empty dispose of this container at

hazardous or special waste collection point.
