

Quality is in our nature

Eurol Swift Clean Wipes 75st Multipurpose, skin-friendly wipes

Description::

Eurol Swift Clean Wipes are multipurpose heavy duty cleaning wipes. These professional cleaning wipes are especially suitable for the cleaning of heavily polluted surfaces of production machines, excavators, tools, metalworking benches, engines, printers or copiers and many other applications, also in the food production. Even though the heavy duty cleaner used in the Eurol Swift Clean Wipes is very effective towards pollutants, it is still friendly for the skin. The “dual purpose wipe” has one side for scrubbing and one side for wiping, making it much more handy in use compared with conventional wipes. The sanitizing cleaner has been dermatologically tested and is completely safe for the skin.

Eurol Swift Clean Wipes are InS / NSF A1 and E2 certified.

Instructions for use:

- Open container and use one wipe at the time
- Close container when not in use
- Use “the scrubbing side” of the wipe for removing hardened or dried pollutant
- Use “the wipe side” of the wipe for removing soft or fluid pollutant
- When not sure try the wipe on a small surface first
- Do not use on a hot surface
- Do not use on Plexiglass
- For removing all cleaner residues rinse with water

Eurol Swift Clean Wipes 75st has the following characteristics:
